Library-Space Database Project Proposal

Background

       Library-Space is a database to be used by a private library it contains all the names genres and other information about a book, textbook or comic the library has. This project would be used by students, casual readers, of comic book fanatics alike looking to find a new textbook, novel, comic. This would help people often looking for a new book to read find what ever is in the genre they are craving or price range they can afford.

Application Requirements

R1.1) Catalogs books, test-books and comics in a way allows users to search for them given price range genre type ect.

R1.2) Add new books brought into the library

R1.3) Inform users whether a book has been sold out or is still in stock

R1.4) Remove books that have been sold out and are not bound to be restocked.

R1.5) Application hosting should be web-based

R1.6) Target size for the database should be around a 100 books.

R1.7) Update prices of books given an increase or decrease.
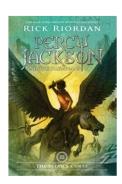

Due Diligence (Copyright Issues)

The database would only contain information about a book and not the contents of the book itself. It is not illegal to catalog the genre type or price of any given novel.
